

## Herbal Milliherb Development since 1999 - 2004 - 2014

Sriana Azis

Pharmacist from University of Airlangga in Surabaya, Economist from University of Indonesia in Jakarta,  
srianazis@gmail.com

### ABSTRACT

The formula Milliherb consists of more than 25 herbs (similar effect) of approximately 70 % vegetable, fruit, spices and 30 % nontoxic Indonesian herbs. Milliherb Medicine that is efficacy similar or more than modern drugs, medicine specific diseases, safe, cost effective, and affordable as a solution for many of our nations health care problem.

**Hypothesis:** mix herbs, small dose (500 mg dry herbs), synergistic (> 800 times), increase the blood flow, and as the body system are in balance. In some cases observed, these medicines have the efficacy of approximately 90 %, or more and have no adverse reaction, with relatively small doses used.

**Obyective** "All diseases have drugs and all disease is curable"

Result Milliherb produces 29 preparation (2004). Medicines consists of 16 products for treatment diseases and 13 products for health promotion. In 2014 it was produces 40 preparation. MILLIHERB used to heal various illness, both incurable illness. The preparations of Milliherb used to treat and / or alleviate pain , gout , uric acid, inflammation, Xgra, women, obesity; antidote (narcotics, smoking); asthma, cough, bronchitis, tuberculosis, cikungunyah, dengue, herpes (another virus infection), constipation and hemorrhoids, cholesterol, hypertension & diabetes, liver diseases, gallstones & hepatitis ABC; pain heart, kidney stones & nephritis, prostate, gastric, intestine & ulcus, anemia, thalassemia and leukemia, brain tonic, eye tonic, skin diseases and acne, leprosy, warts, rheumatism, HIVAIDS, and even for the treatment of tumors & cancer, cirrhosis, lupus , fillariasis, thyroid, ect

**Key word :** milliherb; development; cure; all diseases.

## INTRODUCTION

Over the past fifteen years, I had 40 research mix herbs formulas of Sriana Milliherb from Indonesian. The formula consists of more than 25 herbs of approximately 70 % vegetable, fruit, spices and 30 % nontoxic Indonesian herbs. The substances in our formula are mix with more than 25 herbs, which have similar effect. The mixture more than 25 herbs can decrease doses until 500 mg dry herbs, because there are synergistic and can cure all diseases. Definition; Milliherb is the dose in 500 milligrams (dry herbs) 3 times 1 – 2 capsules daily and can cure/ heal specific diseases.

This is the basis of making herbal medicine “(objective) “All diseases have drugs and all disease is curable”

According to the results observed to use one type of herbs can not cure the disease, because the dose used was too small to cure the disease, but if the dose is increased to cure the disease but side effects occurred. Example katuk leaves (*Sauropus androgynus*) 150 g raw leaves are used for slimming after 4 months of use bronchiolitis after 7-22 months until a permanent severe bronchiolitis epidemic poisoning occurred in Taiwan in 1995. Chia seed as well as the use of 50 g is used for slimming in the United States, Canada and Bali, In the U.S. and Canada began to arise poisoning. Who consume 3 times a day 15 g of raw cassava for cancer can cause irritation - bleeding - fatal.

Traditional medicine complement to modern medicine because many diseases can not be treated with modern medicine. The development of herbal medicine around the world was faster than modern medicine. Especially in developing countries use herbal medicine growing faster.

According to the research pharmaceutical, plants are the primary source for new drugs and it is supported by a reference book about the preclinical and clinical efficacy of herbal medicine. But it is need for a long time and very expensive.

Therefore, the development of research preparation Milliherb herbal formulas since 1999 - 2004 and 2004-2014. In 1999 – 2004 the formula has made 31 preparation, the prior to 2004 named naturopaty-homeopaty (herb Madura). From 2004 till now renamed milliherb and has 40 products. It has also observed an increase composition, it can synergistic of the efficacy of herbal medicine (>800 times), the doses decreased until 500 mg dry herbs. How do to care and treatment success. This research is practice to patients since 1999: the treatment are cured when the symptoms are gone and most of the patients checked into the lab. The success of this drug is greater than 90% and treatment failure due to drug withdrawal or switch to another drug.

The Milliherb formulations are a mix of more than 25 kinds of plants with the same effect since 1999. Formulation mix herbs (Milliherb) more than 25 herbs, it is easily available in Indonesia, very small dose (500 mg), synergistic(> 800 times), it had efficacies for specific diseases, more secure, inexpensive, self medication, care easier, affordable as a solution for many of our nations health care problem.

The basic milliherb formulation is very simple, human beings need a lot of substances; vitamins, protein and minerals in small quantities. Therefore formulations of the Milliherb must be from a mixture more than of 25 from (vegetables, fruits, herbs and plants are not toxic). It was correct and the usual dose can be reduced until 500 mg of dried herb. It was increasing efficacy (synergistic), blood flow and to improve balance and function of the body. Milliherb can heal: all cancer, hepatitis A,B, C; herpes, nephrytis, leuckemia, heart diseases, stroke, rheumatic, diabetes, prostate, anti virus , anti pain, anti bacterial, thyroids, etc.

**The problems :** In Indonesian medicinal plants is widespread and has not been utilized to its full potential as a drug, because it has not found the right formula and the usual dosage to treat specific diseases.  
**Objective:** “All diseases have drugs and all disease is curable”

**Material:** collected from reference books, foreign and domestic pre-clinic research, history, invention, increasing preparation and data collection for the case study of formulas.

**Design research:** Historical Inquiry, Quasi-Experimental, Literary Analysis, Survey/Interview.

**Research:** qualitative of the development Milliherb formulation and it was innovation

**Hypothesis:** small dose, synergistic, increase the blood flow, and as the body system are in balance.

**Data processing:** descriptive analysis.

## History of Making Formula

Every week my grandma made herbal medicine for all the families. In April 1973 my mother had cervical cancer with stage IIA and inoperable due to age 65 years, as well as having hypertension and heart ache. Radiation treatment is given. She began to feel sore joints and bones after 6 months of radiation. Physician diagnosis of cancer has begun to spread to the bone recommended radiation treatment again, but she is not pleased. At that time Dr. Gunawan (RSU Cisarua TB) developing cassava toxic treatment for cancer. She tried this therapy, 3 times a day to consume 15 g of raw toxic cassava. Mom can last up to 3 years without complaining of pain, after 2 years she is often little bleeding. Two months before his death suffering from bleeding, heart disease became worse, and died in May1976. Side effects of toxic cassava is irritation on mucosa, it is proven because we often consume it feels uncomfortable participating in the tongue and throat. Similar with *Sauropus androgynus* (daun katuk) and Chia seed if there are using in a long time and high doses caused side effect.

From the above experiences frequent self-medication for family. We used boiling: betel and kaemferia; tamarind and palm sugar; ginger, kaemferia, piper and palm sugar; lemon juice mixed with honey for to treat a fever, colds and coughs. Mixture; nutmeg, lemon and coconut oil to compress the whole body for children.

Also make herbal medicine for cancer for family and friends was found to reduce pain and improve the quality of life of cancer patients.

In 1998 as a researcher (Ministry of Health) and pharmacist, as well as reference books have the means and the Internet began to make innovative formula Madura Traditional Medicine. At the beginning of each type of preparation consisting of 7-10 or types of vegetables and medicinal plants, because of its success with a small dose is low 20 %, then the amount of herbs plus up to 25 types of herbs and observations seen success ranged 40-50 %. After that the formulas make more than 25 herbs and observations seen success ranged 80 – 90 %. In 2008, all formula plus CaKsaponin 5 % and observation seen success ranged 90 and more than 95 %.

Formula continues to evolve in accordance with the development of our knowledge, patient complaints, and the success of more than 95 % with a case study. Because of limited funds began in early 1999 (14 products) a name jamu Madura until 2001, these herbs go on to sale to the patients, but it didn't registration yet.

At the end of 2001 it was renamed to Naturopathy - Homeopathy Madura The name was Naturopathy-Homeopathy Madura, because the doses small likes naturopathy and homeopathy. In 2003 according to the needs of the patient - homeopathy naturopathic herbal producted into 29 preparations.

In 2003 got the acquisition of patent incentives from Ministry of Reseach. In 2004 the acquisition of patents granted incentives under the Ministry of Research and Technology was Development and Utilization Process 5 Formula Herbal Medicine Naturopathy - Homeopathy with patent registration no : P00200400356. In 2005 Nauropathy- homeopathy renamed to Jamu Millierb.

In 16 November 2005 acquisition of the patent can be more incentives with 5 herbal formulation millierb.

In early 2005 the name of patent was changed to Making Process and Utilization 5 Formula Herb Millierb. Because by using the name of naturopathic – homeopathy, it was similar the use of these drugs is very complicated as the rules of homeopathy. The use of Millierb medicine similar with modern medicine, Millierb adjusted based on symptoms of the disease.

Inearly 2009 the name of patent was changed based on consultation with the Directorate General of IPR officers be Formulation Pharmaceutical Composition for Tumor and Cancer/ **Millitrium** registration number ; P00200400536 and Composition Formulation Pharmaceutical for Liver/ **Millhepar (P002005730)**. The patent numbers to date have not been out (granted). They said that formulas irrational, because it was consist of 68 and 67 herbs.

It has been registered (24 preparation) to the BADAN POM (Institute of Drug and Fool Control) in 2007– 2009 and halal label from MUI.

## Herbal Millierb

The traditional medicine is base similar with food combining for optimal heath. The synergistic is an important concept in herbal medicine. The action of the mixture is greater than sum of the individual part. In other words, the herbs are not active them selves, the mixture of herbs can act to improve the efficacy, solubility or bioavailability and stability. This statement of synergy has been theme of numbers scientific studies.

One example, Shoba G & friend (1998-1999), Influence of piperin on the Pharmacokinetics of curcumin in animals and human volunteers, the administration of curcumin 2 g for rats and 2 g for healthy human cannot be applied because a poor bioavailability. Concomitant administration of curcumin plus 20 mg piperin can increase bioavailability in rats and humans increase 2000% or 200 times can be applied for decrease tumor, and no side effect.

Mixture formula improve efficacy is an important concept in herbal pharmacology. For example; the empirical jamu cabe puyang from Java have more efficacious herbs than a single dosage of curcumin. Because cabe puyang is mixture formula consist of curcumin and piper longa containing piperine compound, that can increase the solubility ( 2000%) of active substances in puyang (curcumin, ginger etc are family Zingiberacea). Zingiberaceae is a plant family consists of turmeric, ginger, kencur/kaemferia, bengle and others.

“So as to formulate the single herb (Curcumin) is useless or can not cure diseases”.

Herbal medicines or herbal formulation according Indonesia empirical is a mixture of more than 7 - 25 types of herbs are equally efficacious. Plants used as medicine because according to the urgent need for someone to make herbal medicine easily available and cheap. Rural communities by using herbs and plants that are nearby based mixed hereditary (empirical) and the results are promising. Many diseases that can not be treated with modern medicine, but it can be treated by herbal medicine.

Herbal preparations (jamu) in Java generally have a weight of 5 - 7 grams of dry herbs, the Java's formulas consist of 7 – 15 types of herbs otherwise the benefits of preventive or promotion not drugs. But in Madura formulas concist of 15 – 25 and doses 2 – 3 g, it is the best Jamu from Infonesia.

Al Quran: The surah that mentions **the bees**—dwelling in mountains, trees, and man-made hives; eating freely of fruited plants; and giving forth variously coloured honeys that hold both healthful delight and healing qualities—as a clear sign of the wondrous bounty of God's creation. It takes its name from the honey bee (al-nahl) mentioned in [verse 68](#) ff.

Research formula of herb Millierb is based on the above consists of more than 25 kinds of herbs and the doses decrease to 500 mg of dried herbs, it has been able to cure specific diseases. Treatment Millierb is a small dose (500

mg), synergistic efficacy more than 800 times, to increase blood flow and to improve balance and function of the body, although Milliherb small doses but can cure all specific diseases.

Motto: "All diseases have drugs and all disease is curable"

From the results of the case study under the synergistic effect of a mixture of herbs in the herbal medicine formula is greater than 25 kinds of herbs, it be able to reduce the dose, synergistic and increase the efficacy of herbal medicine to cure the all diseases.

Our preparations dose of 500 mg / capsule dried herbs, Milliherb use 3 - 6 times 1-2 capsules and Milligesic Oil and Millimiristin (oil) 3 - 6 times 15 drops each can cure & prevent diseases and symptoms was reduced after drinking for 10-15 minutes. The success is greater than 95 %. In general, it is a failure caused by drug withdrawal.

Jamu Milliherb most appropriate solution for treatment, healing are improved cell body function, increasing blood flow for enhancing immune effect. MILLIHERB is guarantee the effectiveness of low-dose, synergistic and do not need to fear of side effects, hypersensitivity, and even the possibility of drug interactions, when combined with modern drug therapies.

From the observation of case studies for 15 years (1999 – 2014), in it turns Milliherb herb may decrease usual dose, more than 800 times smaller than pre-clinic, treatment success can reach up to more than 95 %, and can improve the quality of life in cancer patients for very advanced /chronic and another illness, treatment failure due to drug withdrawal.

Small doses Milliherb provide strength in use, both for prevention and treatment. In that cases, should be considered the most primary prevention, because that is done before the onset of illness; maintenance of body balance easily realized, and good health can be felt. The results of the case studies shown that small doses can cure, eliminating the symptoms and delay the diseases. For example, the common cold can be cured in 3 days and shrink tumor 2 – 6 month.

The Milliherb (Jamu) with the knock nerves therapy (2012) will increase blood flow caused rapidly healing. For instant healing hyper thyroid disease can be cured in 15 – 30 days. The knock nerve is physiotherapy or massage to stimulate nerves knocking with toothpick or brush on the skin effected and whole body . How it works: with a knock nerves on the skin can be activated of nerves peripheral so that local blood flow be increasing throughout the body.

Milliherb was free to use, both for prevention and treatment. Also do not have hesitated to use Milliherb, but must take medication from a doctor. For example; drug therapy for heart: it was Milliherb & heart medication, heart medication therapeutic effect can be enhanced so they can reduce drug doctor slowly. For acute cancer pain (other diseases), Milliherb medicine can be given every 2 – 3 hours. If combined with knock nerves every 2 – 3 hours, the pain was faster disappearance.

The preparations of Milliherb used to cure various diseases, both incurable of illness. The preparations of Milliherb used to treat and / or alleviate pain , pain , inflammation, Xgra, women, obesity ; antidote (narcotics, smoking) ; asthma, cough, bronchitis, & tuberculosis, constipation and hemorrhoids , liver disease , gallstones & hepatitis ABCDEFG; pain heart , kidney stones , nephritis, prostate, gastric, intestine & ulcus, anemia, thalassemia and leukemia , cholesterol, hypertension, blood sugar , brain tonic , eye tonic, skin diseases and acne , leprosy, warts , rheumatism , dengue, herpes (another virus infection), HIVAIDS, and even for the treatment of tumors , cancer , cirrhosis , lupus , filariases etc.

How to use the drug for the treatment MILLIHERB a day 3-6 times 1 capsule ( 500 mg ) and for the prevention every day 1 capsule ( 500 mg ). The results of the case study it turns out the above doses can cure the diseases, and its success reached 95 % and no visible side effects. Treatment failure is generally due to their withdrawal or switch to another medication.

## **Discusstion of product development and the increase of efficacy Milliherb years 1999 - 2004 - 2004**

In 1999 the name is Jamu Madura Berkah. It had 14 products are for allergy, slim, tonic, liver/hepatitis, Xgra men and women, digestive, cholesterol, after birth, kidney tonic, pain and inflammation, diarrhea, cancer, diabetes, asthma. The name of products is based on the contents of herbal. The names were used until 2004. Most of the products sold until 2004 is for pain; tumors and cancers; diabetes, asthma and cholesterol are made since 1999. In 2000 was created 2 products including herbs for the heart and fertility. In 2001 made 6 types of product including prostate, infection, noni (booming), mix curcumine, blood tonic, brain tonic, In 2002 created the antidote , malaria, eye tonic and leukemia. In 2003 made herbal medicine for tuberculosis. In 2004, made herbal medicine for hypertension, it was 29 products

In 2004 the name was changed from Jamu Naturopathy-homeopati Madura be Milliherb. Naming the product into Milli plus disease name.

The products (2) are not made anymore because I do not have the patient of malaria only for social and noni as product Booming.

The products are marketed through a friend, neighbor, family, doctors, midwives and send. From the results of the experience is very difficult to market a new product. because herbs have not been registered with the Institute of Food and Drug Control. But all patients expressed efficacious and can cure cough, flu, asma, nephritis, cancer, hepatitis A, B, C; tuberculosis, thalassemia, hemorrhoids, cholesterol, hypertension, rheumatism, malaria, herpes, antidote,. Having seen the efficacy and success of curing diseases can reach up to more than 90 %, and can improve the quality of life in cancer patients for a very advanced /chronic and another illness, treatment failure due to drug withdrawal.

In late August 2005 found a new product to the oil formula, herbal ingredients dissolved in coconut oil mixed with trymirstine (C22) and another essential oils. It is reaction from herbs solved in coconut oil and plus myristine oil can replaced palmitate and laurate became herb solve in coconut threemyristineoil. It has efficacy as antiviral, antibacterial, fever, pain, inflammation, shrink the lump. The name is Millimiristin oil (C22) or more. It can used to drink and rub or compress for antioxidant, analgesic, antibacterial, virus infections (herpes, dengue cikungunya etc), pain, swelling and sores, tooth ache, burns, ulcers, stroke, acne, hemorrhoids, asthma, cough; reducing rheumatic, hearth, hepatitis A, B, C, D, E, F, G, Cancer, typhoid, tuberculosis, thyroid problems, lupus, and elderly disease (degenerative) etc. That was as antiviral better than antibacterial.

In early 2006, formulated Millikutil or Calcium Natrum saponin was removed of warts, moles, feet sore (without a trace).

In early 2008, formulated Milligesic oil is herbal ingredients dissolved in coconut oil mixed with calcium, kalium saponin and essential oils, it is used for burns, eczema, psoriasis, antiviral (herpes, chicken pox), tbc, inflammation & pain (cancer, bone, gout, and uric acid); ulcers, pain in patients with leprosy, body pain, pain due to stroke, tumors, cancer, sores, thyroids, parasites, toothache, canker, and stomach. Milligesic Oil for pain, inflammation, shrink (tumor, thyroids), anti-bacterial and parasitic better than Millimiristin. Then make cream soap, and lotion for cosmetic; dermatitis; pain, inflammation and shrink; slim; and Xgra for women and men.

In March 2013, formulated Milligesic Oil Mn is herbal (mix flower) ingredients dissolved in coconut oil mixed with essential oils, it was especially for infant and for cream.

In May 2014, development of formulas Milligesic oil and Milligesic cream can speed relief of fever, pain, inflammation, bloating and shrink the lump.

The knock nerves is a physiotherapy or massage with a toothpick or brush, it is innovation in 2012. The knock nerves on the skin (ache, inflammation and tumor) is stimulate nerve periphery to increase blood flow with a toothpick or brush. The blood flow was running well, it can relieve pain symptoms, inflammation, thyroids, shrink the tumor/cancer and that all diseases can be cured quickly.

Clinical trials for the knock nerves and Milliherb therapy of cancer treatment, thyroids, herpes, nephritis, hepatitis, tuberculosis and other diseases using a combination of all three types of drugs and promising opportunities to get a Nobel prize.

The Nobel Prize is a big mouth in order to attract public attention, especially medical experts and traditional medicine experts. The experts consider this formulation only big mouth, a liar and irrational, but the innovation of anti-viral drugs, anti-cancer and non-steroidal anti-pain and non-narcotic not nonsense.

While modern drug innovated to new drug for these diseases did not develop, because the research requires very expensive and need for long time.

**Result**

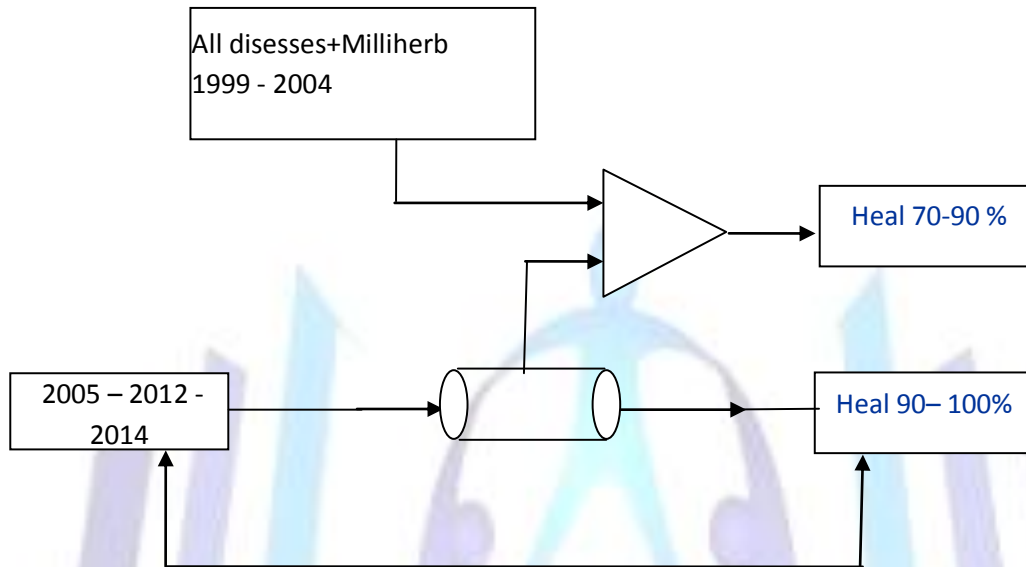

**Tabel development product, care procedure and treatment success from 1999 - 2014**

Name 1999 -2004	indication	Treatment success	Rename 2005 -2014	Information registration 24 formulas

How to use the drug for the treatment MILLIHERB a day 3-6 times 1 capsule ( 500 mg ) and for the prevention every day 1 capsule ( 500 mg ). The results of the case study it turns out the above doses can cure the diseases, and its success reached 95 % and no visible side effects. Treatment failure is generally due to their withdrawal or switch to another medication.

From the above table it can be seen that the development of the product followed by an increase, improvement milliherb indication and physiotherapy (knock nerves) The knock nerves with toothpick or brush combination with Milliherb therapy had the success of treating the diseases approximatly 100 %.

Milliherb produces 29 preparation (2004). Medicines consists of 16 products for treatment diseases and 13 products for health promotion. In 2014 it was produces 40 preparation. MILLIHERB used to heal various illness , both incurable illness. The preparations of Milliherb used to treat and / or alleviate pain , pain , gout , uric acid , inflammation, Xgra, women, obesity; antidote (narcotics, smoking); asthma, cough, bronchitis, & tuberculosis, constipation and hemorrhoids, liver disease, gallstones & hepatitis ABC; pain heart; kidney stones & nephritis; prostate; gastric, intestine & ulcus; anemia, thalassemia & leukemia; blood sugar; brain tonic; eye tonic; skin diseases & acne; leprosy; warts; rheumatism; cikungunyah, dengue & herpes (another virus infection), HIVAIDS, and even for the treatment of tumors , cancer , cirrhosis , lupus , filariases, thyroid, ect

**Conclution**

From the above table it can be seen that the development of the product followed by an increase, improvement milliherb indication and physiotherapy (knock nerves) The knock nerves with toothpick or brush combination with Milliherb therapy had the success of treating the diseases approximatly 100 %.

Milliherb produces 29 preparation (2004). Medicines consists of 16 products for treatment diseases and 13 products for health promotion. In 2014 it was produces 40 preparation. MILLIHERB used to heal various illness , both incurable illness. Milliherb produces 29 preparation (2004). Medicines consists of 16 products for treatment diseases and 13 products for health promotion. In 2014 it was produces 40 preparation. MILLIHERB used to heal various illness , both incurable illness.

Research of the one type of herb can cure for the diseases are waste of money. Because a kind of herb is not possible to cure the diseases, it is need a large doses and we certainly do not know the side effects will arise. Such as Katuk leaf (*Sauropus androgynus*) when used 150 g of crude used for slimming can cause poisoning in Taiwan (1995) severe bronchiolitis - permanent when used for 7-22 months. Equivalent to the use of chia seed 50 g per day as slimming in America and Canada have started to arise poisoning to the hospital.

## Suggestion

Clinical trial should be conducted on the government to allow Millierb herbs used in health centers and hospitals.

The synergistic is an important concept in herbal medicine. The action of the mixture is greater than sum of the individual part. In other words, the herbs are not active them selves, the mixture of herbs can act to improve the efficacy, solubility or bioavailability and stability. This principal of formulation of traditional medicine must socialization around the world by WHO and all Government.
